

Quality Policy

To establish a level of customer satisfaction and confidence in our service, quality, life of product and integrity in our dealings that other would strive to emulate and aspire for worldwide.

This will be achieved by

- 1) Improvements in manufacturing process leading to increase in productivity and quality.
- 2) Improving facility and infrastructure to provide a safe and clean healthy work environment.
- 3) Empowering employees through training and participative management activities.
- 4) Automation in all shop floor activities.

(Revision Ro Wef. 15.11.2007)
